According to FAA (Federal Aviation Administration) NORSEE is Non-Required Safety Enhancing Equipment. NORSEE is not required by any Federal regulation with the intent to measurably increase aircraft safety, but is equipment eligible for installation in an aircraft and can enhance safety. NORSEE includes avionics, electronic instruments, displays and mechanical. Oplite's Tasklight 600, Oplite 4, and Oplite 6 are all FAA NORSEE approved. Oplite's Maplight 4 and Maplight 6 are Certified for Eligible Cessna Aircraft and manufactured and tested in accordance with FAA-PMA-approved protocols.
